

## THE REGULATION OF COMPETITION TERMA-DESIGN 2008

### I. GENERAL INFORMATION ABOUT THE TERMA-DESIGN 2008 – International competition for designers

1. TERMA-DESIGN 2008 is an international competition for the most interesting project of a designer radiator (designer's radiators line) for bathroom, kitchen, living room, office, and other interior rooms. We consider as a designer radiator : a radiator independently of its shape, color, made from round or flat steel profiles or any other profile available on the market, connected together by brass welding "profile in profile" or "profile on profile". All materials that are going to be used together with the technology can differ from the presented above. Please discuss all the details with Marketing Department tel. +48 58 305-80-22 ext. 47 or e-mail: [marketing@termatechnologie.com](mailto:marketing@termatechnologie.com)
2. Terma Technologie Ltd. 80-822 Gdańsk, ul. Rzeźnicka 54/56 is the only one organizer, originator and benefactor of the prizes.
3. The competition has an open character.
4. Participation in the competition is free of charge.
5. The competition has two stages
6. The competition is anonymous till the announcement of the final results

### II. PARTICIPANTS OF TERMA-DESIGN 2008

The competition refers to designers and students of fine arts schools and technical universities from Poland and abroad. Terma's employees together with their family members must not take part in the competition.

### III. AIMS OF TERMA-DESIGN 2008

1. The authors of the most interesting designs have possibility to co-operate with Terma Technologie Ltd. and introduce their product to the market.
2. Promotion of talented designers.
3. Popularization of design art and its role in the human life.
4. Determining new design standards of designer radiators.

### IV. THE TERMA DESIGN 2008 COMPETITION TOPICS

#### STAGE I. – eliminations

The main aim for the participants is to design and visually present the designer radiator (designer radiator's line) for bathroom, kitchen, living room, office and other interior rooms.

Free style takes into consideration comfort of the final users and practical aspects (see: p. VII criteria). Projects can assume other not mentioned functional features that can make the radiator more attractive. The design style is not imposed by Terma.

In the first stage participants are obliged to present conception project of designer radiators (designer radiator's line).

## STAGE II

Authors of 30 appointed projects present their designs in detail that consist of: projection, views and details with measurements, technology descriptions, arrangement's examples etc. (see : p. VI)
